

# How to Use Coupons.com to Save Money Shopping

[Coupons.com](http://Coupons.com) is one of the most comprehensive coupon websites on the internet. Using the coupons.com site allows you to find printable coupons plus coupon codes and discounts for local restaurants, local products, national products, and internet websites.

Here's the walkthrough on how the [Coupons.com](http://Coupons.com) site works.

## The First Screen

When you first enter [Coupons.com](http://Coupons.com), you'll see the site's main screen, which looks something like this:

There are a lot of different ways you can use this site. Each way can save you a lot of money when shopping. Let's walk through how to navigate the site and how to use each of the different sections.

## The Navigation Bar

Along the top and along the left hand side is the navigation bar.

The navigation bar gives you access to the different areas of the website. Each area gives you a different kind of coupon.

Let's start with the [main coupon site](#), which is what you see when you first enter the website. You can also access the main couponing site by clicking on "Coupons."

## The Main Couponing Site

The main site gives you [access to coupons](#) on various products. You can browse the different kinds of products on the left navigation bar.

Each coupon looks like this:

To use the coupon, click the “Clip” button. Once you do, the coupon will change to its “Clipped” look. If you enter various zip codes, you will see different coupons that you can clip and print. Continue browsing and clipping until you’ve clipped all the [coupons](#) you want to print out.

## Printing Your Coupons

Once you’ve [clipped all the coupons you want to use](#), go to the very top of your browser. There will be your coupons indicator, which shows you how many coupons you’ve clipped.

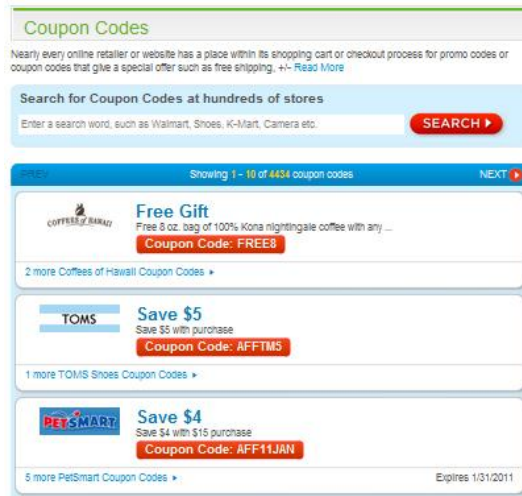

Click the “PRINT” button to [print out your coupons](#).

Now let's take a look at some of the other ways you can use [Coupons.com](http://Coupons.com).

## Online Coupon Codes

Select "[Coupon Codes](#)" on the navigation bar to go to the online coupons codes page. Here's what it looks like:

To use the [coupon](#) codes, either click on the "Coupon Code" button or write down the coupon code. Do your shopping on the site that has the discount, then when you checkout type that coupon code in.

The system will automatically recognize the code and then give you the promised discount.

## Local Discounts

Want a discount in local stores and restaurants? Just click "Local Coupons" along the top. Alternatively, you can type in your zip code in the find local coupons box:

You'll then be presented with the local coupons screen:

Many local coupons are processed through Restaurant.com. Just click one of the coupons to be taken to the appropriate site where your coupon will be processed.

## Coupons.com Savings Card

If you'd rather not print out physical coupons, you can instead use the Coupons.com savings card. Register an account with Coupons.com first. You'll be assigned a card number. Write down that card number. Then, click on the savings card button along the navigation bar to access the savings card page.

Just click “Add to Card” to add that coupon to your card. When you checkout at the grocery store, all you need to do is give them your [Coupons.com](http://Coupons.com) card number and all your discounts will be applied. No printing necessary.

That’s the overview of how to use [Coupons.com](http://Coupons.com). Using coupons can save you money on everyday purchases, online purchases, and even local stores and restaurants.
